Nearly a third of Australians live in regional, rural, and remote areas. Due to Australia's vast size and geographical spread, they face far greater difficulty accessing health services. According to the Australian Institute of Health and Welfare there is an annual underspend on healthcare services for regional and remote areas of at least \$2.1 billion.

The issue isn't a lack of doctors. According to the Australian Medical Association, Australia is heading for an oversupply of doctors and yet three quarters of graduates will live and work in capital cities. Without doctors heading to remote and rural areas, the delivery of healthcare in these areas is seriously under threat.

ZEEP Medical provides recruitment services for locum and permanent doctors regional, rural, remote and very remote hospitals.

We now have over 8,500 active doctors registered with us, have placed over 1,050 doctors, established supplier agreements with almost every health district in the country and work with 190 hospitals, surpassing most competition across the country.

Our innovative achievements are best represented in four areas:

- Financial management

Since the company was founded in July 2017, we have scaled quickly yet

ZEEP Medical provides recruitment services for locum and permanent doctors regional, rural, remote and very remote hospitals.

We now have over 8,500 active doctors registered with us, have placed over 1,050 doctors, established supplier agreements with almost every health district in the country and work with 190 hospitals, surpassing most competition across the country.

Our innovative achievements are best represented in four areas:

- Financial management

Since the company was founded in July 2017, we have scaled quickly yet sustainably. We have become one of the five largest suppliers of locum and permanent doctors to Australian hospitals. In under two years we have achieved over \$7 million in revenue with 409% sales growth in the 2018/2019 FY compared to an average of 3.2% per year in the industry.

- Human resources and employee development

ZEEP Medical was founded as a 'people first' business. Our goal is that we become known as the best recruitment company to work for in Australia. Our turnover rate is near 0%, compared to a peak of 48% in the industry.

In 2019 we were recognised as an Employer of Choice in the Australian Business Awards. In 2018 we were recognised as one of the 'Top 100 Coolest Companies in Australia' by Anthill.

We undertake regular Employee Pulse Check surveys every five weeks (the latest employee engagement rate was 100%) and 360 Degree Management Reviews every four months.

- Customer service

Our excellent customer service experience – for both doctors and contacts in hospitals and/or health districts – is what distinguishes us from our competitors and gives us a genuine point of difference.

Currently our NPS is 83, far exceeding the industry average of 11. Our second largest source of doctors is through referrals, which is a testament to the satisfaction with ZEEP Medical. Every week we receive around five new referrals.

Unlike our competitors, we provide a full end-to-end service for doctors, beyond the scope of what we are paid to do by the hospital. Our goal is to make doctors' lives as simple as possible so that they can focus on saving lives and supporting rural Australia. We handle doctors' travel, car hire, accommodation, payroll, paperwork, Medicare applications and more.

Recently we also invested in mental health training with the Black Dog Institute. Mental health is a serious problem in the medical field in Australia, especially in

helping you to understand the innovation(s) portrayed in the entry. (Choose 0 if no supporting materials are attached.) Scale 0–2, with 0 as low and 2 as high.
